Birthplace: San Vicente, Gapan City

Languages: English, Filipino

John Christopher Olalia

WEB · SOFTWARE · ANDROID DEVELOPER

PROFESSIONAL SUMMARY

Information Technology graduate and developer with hands-on experience building and maintaining web, software, and Android applications. Comfortable across the stack — PHP, Laravel and CodeIgniter on the web, Java for desktop software, and Android Studio for mobile — backed by MySQL and live API integrations. Started as a freelancer, grew through an OJT into a professional software engineering role, and continue to ship reliable, client-focused solutions while learning new technologies.

WORK EXPERIENCE

Software Engineer

Mar 2025 – Present

Penxel Technologies Inc. · Full-time · Makati City (Hybrid)

- Built WMS and inventory systems with barcode receiving, stock transfers, and PR-to-PO procurement.
- Upgraded Laravel enterprise apps with responsive UI, reusable components, and role-based access.
- Handled deployments, databases, Git workflows, hosting, and live support.

OJT Web Developer

Feb 2024 – May 2024

Affirm Technology Inc. · Makati, PH

Gained hands-on web development experience, sharpened technical skills, and contributed to team projects and collaborations using modern web technologies and best practices.

Freelance Developer

2019 – Present

Self-employed

Deliver custom software and consultancy to local businesses across web, desktop, and mobile.

- Gather requirements, then design, develop, test, and maintain tailored applications.
- Optimize database connections and server configurations for reliability.
- Provide regular updates, address concerns, and incorporate client feedback.

KEY PROJECTS

Origami & SPED Web Systems

Built and maintained PHP/CodeIgniter web platforms, including an independently developed SPED therapy site.

PHP · CodeIgniter · MySQL

Clinic Records Management System

Capstone Java (NetBeans) system with SMS alerts, patient monitoring, audit trail, attendance & reports.

Java · SMS API

Xuexi Android App

Android app consuming a live web API with a responsive, user-friendly interface.

Android · API

Agriculture Website

Freelance web project designed and developed independently from concept to deployment.

Laravel · MySQL
