John Christopher Olalia

WEB · SOFTWARE · ANDROID DEVELOPER

PROFESSIONAL SUMMARY

Information Technology graduate and developer with hands-on experience building and maintaining web, software, and Android applications. Comfortable across the stack — PHP, Laravel and CodeIgniter on the web, Java for desktop software, and Android Studio for mobile — backed by MySQL and live API integrations. Started as a freelancer, grew through an OJT into a professional web developer role, and continue to ship reliable, client-focused solutions while learning new technologies.

WORK EXPERIENCE

- Web Developer** May 2024 – Present
Affirm Technology Inc. · Makati, PH
Absorbed full-time after completing OJT and a part-time stint.
 - Built a SPED therapy web platform end-to-end for a special-education program.
 - Diagnosed and resolved bugs and delivered requested features on production systems.
 - Collaborated with the team on modern web practices and client deliverables.
- OJT Web Developer** Feb 2024 – May 2024
Affirm Technology Inc. · Makati, PH
Gained hands-on web development experience, sharpened technical skills, and contributed to team projects and collaborations using modern web technologies and best practices.
- Freelance Developer** 2019 – Present
Self-employed
Deliver custom software and consultancy to local businesses across web, desktop, and mobile.
 - Gather requirements, then design, develop, test, and maintain tailored applications.
 - Optimize database connections and server configurations for reliability.
 - Provide regular updates, address concerns, and incorporate client feedback.

KEY PROJECTS

- Origami & SPED Web Systems**
Built and maintained PHP/CodeIgniter web platforms, including an independently developed SPED therapy site.
 - PHP
 - CodeIgniter
 - MySQL
- Clinic Records Management System**
Capstone Java (NetBeans) system with SMS alerts, patient monitoring, audit trail, attendance & reports.
 - Java
 - SMS API
- Xuexi Android App**
Android app consuming a live web API with a responsive, user-friendly interface.
 - Android
 - API
- Agriculture Website**
Freelance web project designed and developed independently from concept to deployment.
 - Laravel
 - MySQL
